

## About UC Chemicals

UC Chemicals is a cloud-based chemical inventory management tool developed with a researcher-centric approach. It allows easy tracking and maintenance of containers using a barcoding system. Chemical and safety information, such as hazard codes and first aid, are auto populated. The application enables users to create chemical networks to easily share chemicals while controlling access. UC Chemicals includes a complementary web application that works in sync with the mobile app and has additional features such as structure search and import/export capabilities.

## Installing the UC Chemicals Application

### For iOS users

1. Navigate to the App Store
2. Search for UC Chemicals – Pilot
3. Select **Install**
4. Launch the application
5. Select your campus
6. Log in with your campus credentials

### For Android users

1. Navigate to the Google Play Store
2. Search for UC Chemicals – Pilot
3. Select **Get**
4. Launch the application
5. Select your campus
6. Log in with your campus credentials

## Adding Lab Managers (For PIs and Lab Managers-- Desktop)

1. Log in to <http://ehs.ucop.edu/chemicals>
2. Select the **Manage Lab** button
3. Select the **:** menu icon located to the right of Members
4. Select **Add/Remove Lab Managers**
5. Select the members you wish to add or remove as Lab Managers
6. Select **Done**

## Manage Lab (For PIs and Lab Managers-- Desktop)

PIs and delegates have access to the Manage Lab section to perform administrative functions and can be accessed on the desktop version <http://ehs.ucop.edu/chemicals>

### Inventory Summary

- Provides a summary of Total Chemicals and Total Containers in your lab
- View containers currently barcoded
- View containers missing barcodes

### Manage Tags

- Add or remove tags for your lab
- View lab members in your group

### Friends

- Add labs you work closely with to share chemicals
- PIs have the ability to mark containers as private for chemicals they wish not to share

### Export and Import Inventory

## Manage Lab (Continued)

### Defining Sublocations

- Adding a sublocation
  1. Select the **+** button to the right of the Sublocations
  2. Select the **Building Name**
  3. Select the **Room Number**
  4. Enter in a **Sublocation Name**
  5. **Barcode** – The barcode can be entered in manually or scanned at a later time with your mobile device
  6. **Temperature** and **Pressure** default to Ambient and can be edited as needed
  7. Mark the sublocation as private to prevent sharing
  8. Select the appropriate hazard pictograms associated with the chemicals stored in the sublocation
  9. Select the **Save** button
- Editing a sublocation
  1. Select the  menu icon to the right of the sublocation you wish to edit
  2. Select **Edit**
  3. Edit information as needed
  4. Select the **Save** button
- Removing a sublocation
  1. Select the  menu icon to the right of the sublocation you wish to remove
  2. Select **Remove**
  3. Select the **Save** button

Note: Before a sublocation can be deleted, the PI or delegate will be prompted to move the associated containers to the correct sublocation.

### Barcoding Sublocations (For PIs and Lab Managers-- Mobile only)

Barcoding sublocations allow users to enter specific location by scanning a barcode and is also crucial to the reconciliation process. Reconciliation relies on scanning the sublocation barcode followed by scanning all containers at this sublocation. Therefore it is recommended to barcode all sublocation during initial set-up of the lab. Use the same barcode labels that are used for barcoding containers.

1. Place a barcode on your sublocation
2. Launch the app on your mobile device
  - a. Select the settings icon  in the upper right hand corner
  - b. Select the **Barcode your sublocations** link
  - c. Select the sublocation
  - d. This will enable the camera feature on your mobile device
  - e. Scan the barcode

### Barcoding Imported Inventory (Mobile only)

Once inventory file is imported, all containers are available for barcoding based on their sublocation. All users can share the task of barcoding.

1. To begin barcoding inventory
  - a. Launch the app on your mobile device
  - b. Select the settings icon  in the upper right hand corner
  - c. Select the **Barcode your imported inventory** link
  - d. Select a **sublocation** and then a **chemical** from the list
  - e. Select **Display**
  - f. Select **Missing Barcode**

For more information about UC Chemicals, contact [service@RiskandSafetySolutions.com](mailto:service@RiskandSafetySolutions.com)

## Barcoding Imported Inventory (Continued)

2. To barcode the container
  - a. Retrieve the chemicals and place a barcode on your container
  - b. On your mobile device, select the container you wish to barcode
  - c. This will enable the camera feature on your mobile device
  - d. Scan the barcode (The container will clear from the Missing Barcode list and appear on the Barcoded list.)
3. Repeat Step 2 to barcode all of your inventory

Note: You can also swipe left on a displayed container to edit or delete the container.

## Adding Chemicals

### To Add Chemicals

1. Select **Add** from the home page
2. Search chemicals by CAS number, product ID or name
3. Select the chemical
4. Select the add icon  on the right of the container section
5. Enter container information
6. Select **Save**

### To Add Commercial Chemicals (for Lab Managers and PIs only)

1. Select **Add** from the home page
2. Select the  menu icon
3. Select **Add Commercial Chemical**
4. Enter chemical information
5. Select **Save**

### To Add a Novel Compound

1. Select **Add** from the home page
2. Select the  menu icon
3. Select **Add Commercial Chemical**
4. Enter chemical information
5. Select **Save**

## Creating a Custom Chemical Name (For PIs and Lab Managers -- Desktop only)

1. Select **Search Chemicals** from the home page
2. Select the chemical
3. Select the  menu icon
4. Select **Custom Chemical Name**
5. Choose from synonymy list or select **Create custom name**
6. Select **Save**

## Reconciliation (For PIs and Lab Managers -- Desktop only)

You will need a handheld scanner for reconciliation. Contact your organization's EH&S department to request one.

1. Select **Manage Lab** from the home page
2. Select the **Reconcile Your Lab** link
3. Select the **Start Scanning** button
4. Scan sublocation
5. Scan the sublocation's containers
6. Repeat for all sublocations
7. Connect the scanner and select **Upload Barcodes**
8. Review report
9. Resolve any conflicts
10. Select the **End Scanning** button once complete
